
FLE Reading Curriculum

Success for All Reading

- Success for All Reading is a whole-school reform strategy that engages students and transforms instruction, learning, and school culture.
- The great strength of the Success for All approach is that all our methods are based on proven research, ensuring that schools have effective strategies to help students realize their learning potential.
    - It emphasizes prevention and early intervention to ensure student success. Teachers teach the whole child, treating social and emotional learning, behavior, and cooperation as important as academics.
    - Learning is consistently monitored with the cycle of effective instruction.
    - Everyone is involved in support of student success – teachers, parents, community members, and the students themselves.

Our program includes the following:

• **Early Learning** (Curiosity Corner for Pre-K and Kinder Corner for Kindergarten)	• **Reading Roots** (Grades 1-2)	• **Reading Wings** (Grades 2-5)

Consistency between these levels has proven to be important to the success of students.

Amira Learning

- Amira Learning is our reading intervention that redefines literacy education with a groundbreaking AI Intelligent Growth Engine.
    - Amira seamlessly integrates assessment, instruction, and practice with our existing literacy curriculum.
    - Amira listens as students read aloud, using advanced speech recognition and natural language processing to continuously assess reading mastery and inform practice and instruction, powering true differentiation.
    - Amira identifies reading difficulties in real time and delivers micro-interventions based on decades of reading and neuroscience research.
